(+57) 310 271 1918

Software Engineer with 15 years of experience with technologies like .Net Core, Angular version 7+, I love the trekking and pets, I'm curious and I love the programming

SKILLS

Programming languages: JavaScript, Typescript, C# and visual Basic

Tools and frameworks: Angular from version 8, NodeJs, Express, MongoDB, SQL server

Programming IDE: visual code, .net 2003, .net 2005, .net 2008, .net 2015, .net 2019, Robot 3t and microsoft management

English level: B1, English Class from May 2021

EXPERIENCIE

GLOBANT *Analist Development senior*
MAY 2022 - Actually

Functions

- Developing applications in Angular >8 and .NetCore c # (REST API).

ASESOFTWARE *Analist Development senior*
MAY 2021 - Actually

Functions

- Developing applications in Angular(versions between 10 and 12) .
- .Analyze and develop functionalities and new BackEnd solutions with microservices architecture with .NetCore c # (REST API).
- Implementation of unit tests to the developments made with the NUnit framework, implementation of TDD.
- Deployment of projects and functionalities in Azure DevOps (Pipelines), use and practice of CI / CD.
- Application of Scrum methodology. - Design and develop solutions based in .Net

Applications done:

Banco republica (republic bank): Application with integrations with others banks for money exchange

- Angular
- Material Angular

This application was migration and java servlets faces to Angular

ANT (National land agency): System with integration agriculture ministry where the distribution of land is managed , its application was development with

- Angular
- Mongo
- .Net Core 5.1
- Prime React
- Sql Server
- Redis
- Rabbit Mq

SWISS CONTACT: Application of evaluation of agricultural organizational models, the technologies used:

- .Net Core + Angular 12
- SQL SERVER.
- Material Angular
- Signal r

CJV -POB Full *Stack Web Developer*
OCTOBER 2015 – MAY 2021

Functions

Web application developer, made in technologies such as .net Core, MVC and angular (version 7+) for different users based in Israel and Argentina

Achievements

- I Proposed the base structure for future implementations of components such as graphics and dynamic statistics for international distributors for the reduction of repeat codes.
- Validated and actively contributed to the design phase of the user interface for international users.

Participation in application development: :

HelpDesk: Software designed to help in IT management the technologies used were:

- NG Prime.
- Angular.
- Mongo Express Angular NodeJs (MEAN).

Control SAJAR: Software for the entry and exit of company employees, allowed calculator for the payment of overtime, the technologies used:

- .Net Core + Angular 8
- SQL SERVER 2016

NIHUL: : Application to manage the land acquisition process, the technologies used were:

- .Net Core + Angular 8
- SQL SERVER 2016

ISHURIM: Application to manage the workflow on the purchase area, the technologies used were:

- Asp.net.

- SQL SERVER. 2016

Kupot: Application used in the Petty cash management; the technologies used were:

- .Net Core + Angular version 8
- SQL SERVER 2014

Jozim: Application for contract management of the company, the technologies used were

- Asp.NET (2015) + MVC
- SQL SERVER

AFI Application in charge of the management of fixed assets and acquisition, with the accounting management and depreciation of the company's assets, technologies used were

- Asp.NET (2015) + MVC
- SQL SERVER

SAJAR Application for the payment of payroll, and discounts for health and pension

- Windows Forms 2015
- SQL SERVER 2012

Cesvi Colombia – *Full Stack Developer*

March 2008 - June 2015

Functions

Web application developer, I worked with technologies such as Asp.net with Visual Studio 2005 and Visual Studio 2010, for insurance sector

Achievements

Position the applications in the insurance companies of Colombia, as essential tools in the management of vehicular accidents:

Aplicaciones realizadas

Sipo: Vehicle damage appraisal system, web application, with technologies as asp.net 2003 and 2010.

Repuestos (Parts of car): Web application to sell spare parts for vehicles recovered in collisions. With technologies as Visual Studio 2010

SICUAD: Human material damage assessment system.

DASIGNO S.A – *Full Stack Web Developer*

Diciembre 2006 – febrero 2008

Functions

Web application and Windows form developer, technologies such as with Visual Studio 2003

EDUCATION

MCSA: SQL Database Development - Certified 2021

EAN University– Santafé de Bogotá
Computer Management Specialization 2017

Piloto University– Santafé de Bogotá
DBA ORACLE Diplomat 2008

Cundinamarca University– Cundinamarca, Facatativá
System Engineer August 2006

Koe -Colombia
English 2021-2022

Microservices with ASP.NET Core, Docker y RabbitMQ-Udemy
Certified 2022

Microservices with ASP.NET 5, Angular, MongoDB, Docker -Udemy
Certified 2022

ASP NET Core Unit Test | NUnit y XUnit | Visual Studio 2022-Udemy
Certified 2022

Angular from o to expert (legacy) -Udemy
Certified 2022
